## Rapid<sup>®</sup> 2000

Specially hardened, slide coating, yellow galvanised

### Tip

With 30° geometry:

- > Reduced split effect
- > Quicker bite
- > No pre-drilling required

### Milling pockets

Underhead milling pockets for optimal countersink:

- > Smooth
- > Gentle on material
- > Also ideal for fittings

### Thread

Double thread with integrated notch, recessed second thread turn rolled out to the tip:

- > Minimised blast effect
- > Improved pull-out values
- > Quicker screwing

### End mill cutter

The friction part reduces screwing resistance.

With 170 years of experience in Austria **schmid schrauben** is one of the technology leaders throughout Europe in screw production and fastening technology.

**schmid**  
schrauben hainfeld

Technological edge, flexible production, custom packaging and fast delivery form the core values for which schmid schrauben stands.

Besides their own brands RAPID<sup>®</sup> and Stardrive GPR<sup>®</sup> as well as other product lines, schmid schrauben develops and produces custom-made products with screw lengths of up to 1,500 mm.

## CLASS EN MASS

Regardless of which schmid schraube you rely on, you thereby rely on a manufacturer with added value: schmid schrauben produces according to ETA specifications and is ISO-14001 certified.

## QUALITY CONNECTS

Leading and reliably produced screw technology creates connections that hold firm. Also between you and your customers: thanks to excellent delivery capability and the personal service of schmid schrauben.
